

Company Profile

Since its establishment, SonoScape has been committed to providing high quality medical equipment for the healthcare sector. SonoScape specializes in the development and production of diagnostic ultrasound solutions. By introducing advanced imaging techniques, SonoScape has improved diagnostic accuracy and therefore enabled better health outcomes. Since 2002, SonoScape has reached and benefited millions of people from over 100 countries. With the world in mind, SonoScape will continue providing more effective and accessible healthcare solutions, through persistent innovation and passion for life.

Quote from the Analyst of

"SonoScape Co. Ltd. has exhibited exceptional entrepreneurial capabilities ... The company's priority in maintaining high levels of quality in its product lines is well supported by the negligible after-sales costs associated with its ultrasound systems. Also with the launch of SSI-1000, the hand carried ultrasound with multiple clinical applications; SonoScape has made significant strides towards establishing itself as a global medical equipment manufacturer."

Mr.Krishanu Bhattacharjee

Company Milestone

- 2002: Company Founded in Shenzhen, China
- 2003: Released SSI-1000: the 1st 15" Portable Color Doppler system in China
- 2004: Released SSI-2000: the 1st PC platform Color Doppler system in China
- 2005: Received the "High Technology Company" award from the PRC government
- 2007: Received "CHINA TOP BRAND" award in the Medical Equipment Industry
- 2007: Released the 1st Real time 4D ultrasound system in China
- 2008: Received "European Entrepreneurial Company 2008" award from FROST & SULLIVAN
- 2008: Received "Flagship Company" award in the Medical Equipment Industry in China
- 2009: Received "Product Quality Leadership Award 2009" award from FROST & SULLIVAN in London, UK
- 2011: Received the Reddot 2011 Product Design Award for S20 in Essen, Germany

S11V

Fully-integrated Solutions for
Veterinary Imaging

SonoScape

Caring for Life through Innovation

S11V Compact Console Ultrasound System

S11V is a high performance veterinary ultrasound cart based system delivering breakthrough technologies and providing outstanding versatility and performance for the modern small or mixed animal veterinary clinics or research laboratories. Developed on the new SonoScape software platform and sophisticated ergonomic design, the S11V is specially optimized for smooth workflow and convenient operation.

Major features such as specialized veterinary patient information input interface, dedicated structure of veterinary applications and presets, veterinary application icons and body marks, reproductive gestational age and obstetric calculation package make this system a truly unique dedicated veterinary ultrasound system.

S11V
Fully-integrated Solutions for
Veterinary Imaging

Satisfactory Solution

Compact in size while full in functionality and feature, the S11V is specially engineered for all aspects of veterinary ultrasound imaging with multiple standards and optional imaging technologies at a very affordable price.

Broad Range of Applications

Optimized for a board range of animal clinical applications: abdominal, reproductive, cardiac, tendinous, thoracic, small parts exams for large or small animals, including feline, canine, equine, bovine, ovine and suidae.

Complete Working Modes

- B Mode, Dual B, Quad B
- M mode, Anatomic M
- Color Mode, DPI Mode
- PW Mode, CW Mode

Proven Technologies

- Tissue Harmonic Imaging
- Trapezoidal Imaging
- Spatial Compound Imaging
- Panoramic Imaging
- Micro-scan Speckle Reduction

Specialized Application

The S11V is fully configured with a dedicated veterinary software package so as to satisfy the increasing clinical requirements for reliable veterinary diagnosis.

- User-definable graphic exam modes applicable for small and large animals.
- More than 50 kinds specialized veterinary body marks and annotations
- Abundant veterinary measurement and calculation software package, especially in animal prenatal diagnosis
- Professional veterinary high density linear array for endocavity reproductive and superficial application
- Reliable veterinary design such as anti-dust and anti-splash control panel

Simplified Workflow

Designed on the powerful new platform which provides versatile solutions for smooth workflow and convenient operation, the S11V will speed up the veterinarians' exam process and significantly improve their ultrasound scanning experience. The smart workflow will help them work smart.

Fully customized working setting

Multiple predefined and user configurable presets, function keys, formulas, measurements, report layout for each clinical specialties for simple operation

M-tuning function

Make it easy to achieve the optimized 2D and Doppler image with minimal keystrokes

Clip-board function

Convenient image review during scanning

Smart patient file management

Easy access to patient image and data storage, retrieve, review and report

Various data solutions

320G Hard drive, Dual USB port, VGA, S-Video, LAN port, video printer, USB laser/jet printer.....

Value-added DICOM functions

Save, Storage Commitment, MPPS, Print, Wroklis; providing more advanced file management solutions

Streamlined Design

The ergonomics of the S11V ensures the convenience of daily operation and reduces repetitive stress injuries due to daily activities. This streamlined console with space for peripherals such as video printers is easy to move from room to room, and the system's operation panel has been designed to be both user-intuitive and ergonomic...All these factors contribute to better workflow and high efficiency.
