Caring for Life through Innovation

X3 VET

SonoScape

Combining efficiency, simplicity and versatility the X3 Vet is a great choice for equine examinations. Incorporating magnesium alloyed materials makes it a light, easy and durable system to take out into the field, withstanding the hazards of working around equines. Equipped with specialty transducers and equine specific software the X3 Vet easily produces stunning images across necessary applications for equines such as MSK, reproductive organs, and has the penetration needed for abdominal and cardiac scanning as well.

Efficient Experience

Since X3 Vet adopts SonoScape's latest imaging technologies to produce excellent images with high resolution and deep penetration, presenting a large amount of information onto the ultrasound screen. Improved image quality will allow for faster and more accurate exams of any species.

- Multi-beam processing technology
- C-field beam technology
- Spatial compound imaging
- μ -Scan image processing technology
- Pure inversion harmonic imaging

Advanced imaging technologies for high quality images to satisfy various practices, academia, research, and wildlife

Satisfying equine presets for cardiac, abdominal, tendon, and reproductive evaluation

Dedicated measurement, calculation, and annotation for each exam mode

180° Wide range folding angle and viewing angle

Anti-reflective screen and backlit keyboard

Splash resistant and dust proof keyboard protective covering
